Admission Requirements

GENERAL REGULATIONS

1. Candidates for admission to the Faculty of Arts who do not present certificates of Departmental Junior Matriculation or its equivalent must pass the admission examination of the Western University. This examination is set, in full, only for students of Huron College. Candidates presenting certificates of Departmental Honor Matriculation or equivalent shall be admitted to Honor Courses in the First Year in any work corresponding to their certificates; or they shall be given First Year standing in the General Course in the subjects covered by their certificates.

2. The equivalents of certificate of Departmental Junior Matriculation are: (1) Normal Entrance, (2) certificate of matriculation at any accredited university. The equivalents of certificate of Departmental Honor Matriculation are: (1) Entrance to Faculty of Education (2) certificate of Honor Matriculation at any accredited university.

3. Candidates presenting certificates of matriculation lacking two subjects may be admitted to the courses in the First Year without any examination. Those who enter, however, in this way must, before beginning any work of the Third Year, have completed matriculation at regular examinations held at the University in May and September.

4. The subjects of Junior Matriculation are as follows: Latin, English, History, Mathematics, and any two of the following: Greek, French, German, Experimental Science.

NOTE.—Students registered with theological bodies may present First Year Hebrew in lieu of one optional subject.

5. The pass standard for admission is forty per cent. in each subject. The first-class honor standard is seventy-five per cent., the second-class honor standard sixty-six, and the third-class fifty per cent.

SPECIAL STUDENTS

6. Special Students who are not candidates for a degree may be admitted to classes in the university if, in the opinion

of the professors in charge, they are qualified to pursue satisfactorily the courses chosen. Such special students must satisfy the professors in regard to regular attendance and attention to the work of the class. They will not be allowed to advance from year to year in a department without taking the regular examinations. Non-matriculated special students will not be admitted to more than four courses of a year.

7. Special Students may, at the beginning of any college year, on presenting qualifications for admission, be allowed to enroll as regular students and become candidates for degrees subject to the regulations governing such students. The work satisfactorily carried and passed by them as special students will be put to their credit for the degree of B.A.

ADMISSION "AD EUNDEM STATUM"

8. All applications for advanced standing must be accompanied by official certificates of standing from the institutions where previous work has been done. These applications shall be referred to a committee of the Faculty of Arts to be composed of the heads of all departments in which students ask credit for work done elsewhere.

EXTRAMURAL STUDENTS

9. For sufficient reasons, students may, on application to the Senate, be allowed to enter upon or pursue the work of the courses, and to present themselves for examination at the appointed time without attendance upon classes; but such extramural candidates for degrees must, before being enrolled, present certificates of Departmental Junior Matriculation in Arts or equivalents, as in §2 above, or pass the admission examination of the Western University. Provision may be made by the Senate for examination of extramural students at a local center, the cost of the examination to be defrayed by the candidates. Extramural students are subject to a special fee of ten dollars, to be paid annually at the time of registration.

JUNIOR MATRICULATION: PASS

The following are the requirements of the Department of Education for Junior Matriculation.

GREEK.

Translation into English of passages from the prescribed texts, with questions thereon.

Translation at sight of simple narrative passages similar to the Xenophon prescribed.

Questions on Greek accidentance and on the common rules of Greek syntax, to test the candidate's accuracy and comprehension in such matters as are needful for the intelligent reading of his texts.

The following are the prescribed texts:

Xenophon, Philpotts and Jerram, *Easy selections from Xenophon* chaps. 3, 4, 5; Homer, *Iliad*, VI., 66-118 and 237 to the end.

LATIN.

Translation at sight of passages of average difficulty from Cæsar, upon which special stress will be laid.

Translation, with questions, from a prescribed portion of Vergil's *Æneid*.

Questions on Latin accidentance.

Translation into Latin of English sentences involving a knowledge of the following principles of Latin syntax: The common uses of the cases; the accusative with the infinitive; the subjunctive in simple sentences; final and result clauses; the law of the sequence of tenses; the indirect question; verbs of fearing, doubting and hindering; the use of the participle, gerund and gerundive, active and passive periphrastic; indirect discourse; and the common forms of the conditional sentence.

The vocabulary will be taken from the prescribed portion of Cæsar and special stress will be laid upon this part of the examination.

Examination upon a short prescribed portion of Cæsar, to test the candidate's knowledge of Latin syntax and his power of idiomatic translation.

The following are the texts prescribed:

Cæsar, *Bellum Gallicum*, Book IV., chaps. 20-38, and Book V., chaps. 1-23; Vergil, *Æneid*, Book II., 1-505.

ENGLISH.

Composition: An essay on one of several themes set by the examiner. One examination paper.

Literature: One examination paper on the following:—

Coleridge, *The Ancient Mariner*; Tennyson, *Lotos Eaters*, *Ulysses*, "Of old sat Freedom," *Locksley Hall*, *Songs from the Princess*, *Ode on the Duke of Wellington*, *Charge of the Light Brigade*, *Enoch Arden*; Shakespeare, *Julius Cæsar*.

FRENCH.

The candidate's knowledge of French will be tested by: (1) simple questions on grammar; (2) the translation of simple passages from English into French; (3) translation at sight of easy passages from modern French, and (4) an examination on the following texts:

The texts contained in the New High School French Reader.

Daudet, *Le Petit Chose à l'École* (*Blackie's Longer French Texts.*)

Two papers will be set: (1) Prescribed texts and translation at sight; questions on grammar; (2) the translation of English into French.

GERMAN.

The candidate's knowledge of German will be tested by: (1) simple questions on grammar; (2) the translation of simple passages from English into German; (3) translation at sight of easy passages from modern German, and (4) an examination on the following texts:

The texts contained in the New High School German Reader.

Seidel, *Aus goldenen Tagen*, (edited by W. Bernhardt).

Two papers will be set: (1) prescribed texts and translation at sight; questions on grammar; (2) the translation of English into German.

HISTORY.

British History—Great Britain and Canada from 1763

to 1915, with the outlines of the preceding periods of British and Canadian history.

The geography relating to the history prescribed.

One examination paper.

Ancient History—General outlines of Greek history to the death of Alexander and of Roman history to the death of Augustus.

The geography relating to the history prescribed.

One examination paper.

MATHEMATICS.

Algebra—Elementary Rules; highest common measure; lowest common multiple; fractions; square root; simple equations of one, two and three unknown quantities; indices; surds; quadratics of one and two unknown quantities.

One examination paper.

Geometry—The examination will be based on the course of study in this subject as prescribed by the High School Regulations of the Ontario Department of Education for the Middle School, and will involve a practical test of the candidate's acquaintance with the graduated ruler, the compasses, the set square and the graduated circle in the solution of simple geometrical problems. The course is covered by The Ontario High School Geometry.

ELEMENTARY EXPERIMENTAL SCIENCE.

Physics—An experimental course in Heat, Sound, Light and Electricity.

One examination paper.

Chemistry—Physical and Chemical Changes, Elements, etc.

One examination paper.

JUNIOR MATRICULATION: HONORS

41. Requirements as prescribed by the High School Regulations of the Ontario Department of Education for the Upper School.

The General Course

GENERAL REGULATIONS

10. There are two ordinary modes of proceeding to the Degree of Bachelor of Arts, viz.: (1) by taking the General Course; (2) by taking an Honor Course.

11. An undergraduate is entitled to the degree of Bachelor of Arts if in each year of his course he passes the examinations in the prescribed work of the General Course.

12. Candidates in the General Course in Arts shall be ranked in order of merit in each subject in the annual class lists in three grades, A, B, C; the minimum for grade A shall be seventy per cent. of the marks, and for grade B fifty-five per cent.; all who pass with less than fifty-five per cent, but not less than forty per cent. (the minimum for pass), shall be placed in grade C.

13. In all subjects of the General Course the ratio of term-work marks to examination marks will be as fifty to one hundred. To pass, a student must obtain forty per cent. on the whole of a subject, with thirty-three per cent. both in the term work and in the examination. In an Honor Course the ratio of term-work marks to examination marks is determined by the teaching staff in that subject. Term work will not be credited to a student beyond the year in which it is taken, if he has to pass a supplemental examination; on that he must obtain forty per cent.

14. Regular students in the General Course who have not attended at least eighty per cent. of the lectures for the term in a subject may be debarred from taking the sessional examination on that subject.

15. Sessional examinations will be held for the General Arts course in January and in May. The student must obtain the required percentage, at least forty, both for the first and for the second term's work in each subject. Examinations will be held in May for those who have failed in the first term; in September for those who have failed in the second term's work or in the year's work in any subject.

16. Students failing to obtain twenty-five per cent. on the year's work in a subject shall not be eligible for re-examination without a further year's attendance on the lectures in the subject in which they have failed.

17. In courses where each year's work depends directly upon that of the preceding year, no student who has failed may take up the work of the following year. The application of this rule shall rest with the professor in charge.

18. A student who at the close of the September supplemental examination has not obtained standing in at least half of the subjects of the year shall not rank as a student of the succeeding year, though he may be allowed to proceed in those subjects in which he has obtained standing.

19. For sufficient reasons, a student may, on application to the Senate, be permitted to present himself for an examination in a subject without previous attendance upon classes.

20. When a candidate at an examination is starred in a subject which is one of two or more subjects between which an option exists at the said examination, the candidate at his supplemental examination may present himself in any one of such alternative subjects, subject to the condition laid down in §19.

21. A student who has not been granted complete first-year standing may not enter upon any work of the third year; nor a student who has not been granted complete second-year standing, upon any work of the fourth year.

22. A student in the General Course who wishes to take honors in a department may be allowed to repeat his year, taking the work of the honor department only, if he so desires, and on passing with honors he shall be allowed to proceed in that department.

REQUIREMENTS FOR B.A.

The subjects to be taken by those pursuing the General Course are:

FIRST YEAR—English Literature; English Composition; Latin; Mathematics; any three of: French, German, Greek, Hebrew, Biology, Chemistry, Physics.

SECOND YEAR—English Literature; English Composition; Latin; any four of: Ancient History and Logic or Ancient History and Psychology, Mathematics, French, German, Greek, Hebrew, Biology, Chemistry, Physics, Public Health and Bacteriology, Economics.

THIRD YEAR—English; European and British History; Ethics and History of Philosophy; any three of: French, German, Greek, Hebrew, Latin, Biology, Chemistry, Physics, Economics.

FOURTH YEAR—English; European and British History; Constitutional History of England and Canada; any three of: French, German, Greek, Hebrew, Latin, Astronomy, Chemistry, Geology, Constitutional and Diplomatic History of the United States, Modern Philosophy, Economics.

THE B.A., M.D. COURSE

Graduates in Medicine will be granted the degree of B.A. on passing the regular examinations in the following Arts subjects (§18):

FIRST YEAR—English; Mathematics; and any two of the following subjects: Latin, Greek, French, German.

SECOND YEAR—English; one of the languages previously taken; Economics; and one of the following: Mathematics, Ancient History and Logic, the other language.

THIRD YEAR—English, a language selected previously; European and British History; Physics and Mechanics, or another language previously selected.

FOURTH YEAR—English; a language already selected; European and British history; Geology.

THEOLOGICAL OPTIONS

Theological students in affiliated colleges pursuing the General Course are allowed the following options:

SECOND YEAR—Ancient History and Logic must be taken.

THIRD YEAR—Biblical Greek for Classical Greek; Theism and Psychology must be taken.

FOURTH YEAR—Biblical Greek, Church History and Biblical Literature for three Arts Options.

Note:—Biblical Greek for Classical Greek, in the third and fourth years, involves a thorough knowledge of the Text and Introduction of Two selected Books of the New Testament in each year, exercises in Grammar and Composition and examinations midyear and final in each Book. Not less than three hours a week during each session.

Church History—The Option calls for a course of lectures with midyear and final examinations in the period of Early Church History (1 hour a week) and either the earlier or later period of English Church History with examinations as above (not less than two hours a week during the session, and essay work).

Theism calls for two hours a week during the session, with essays and examinations.

Biblical literature calls for attendance at lectures 2 hours a week during two college sessions, with examinations.

THE COURSES

FIRST YEAR

ENGLISH LITERATURE.

Literature—Ben Jonson, *To the Memory of Shakespeare*; Milton, *Lycidas*, *L'Allegro*, *Il Penseroso*, *Epitaph on Shakespeare*; Pope, *Rape of the Lock*; Burns, *Tam O'Shanter*, *To William Simpson*, *Address to the Deil*; Crabbe, *The Village*, I and II., *Peter Grimes*; Wordsworth, *Tintern Abbey*; Coleridge, *Christabel*, *Kubla Khan*, *To a Gentleman*; Byron, *Childe Harold IV.*; Scott, *Redgauntlet*; Keats, *Eve of St. Agnes*; Thackeray, *Henry Esmond*; Tennyson, *In Memoriam: Proem*, 1, 27, 31, 32, 53, 56, 76, 95, 105, 129; Browning, *Fra Lippo Lippi*, *Caliban*; The selections from Cowper, Carlyle, Thackeray and Stevenson in *Selected English Essays* (Oxford University Press).

NOTE.—The poetical selections are to be found in *The English Parnassus* (Clarendon Press). (2 hours a week).

Literary Interpretation—This course includes (1) A study of selections from orators, essayists, dramatists and poets, illustrative of the principles of oral interpretation; (2) Lectures following the sixteen progressive and graded steps through which the student may advance to understanding of the teacher's criteria; (3) Instruction in the science of sounds in language and an analytic study of English pronunciation and enunciation. (1 hour a week).

ENGLISH COMPOSITION.

The writing of at least four original compositions. Fortnightly themes in class. Provision will be made by a special paper in English Composition for the examination of candidates who are not in attendance, and who have not presented the essays required. Carpenter's *Rhetoric and English Composition* (Macmillan) is recommended. (1 hour a week).

LATIN.

1. Cicero, *Pro Lege Manilia* and *Selected Letters*. (Greenough's edition of Cicero's *Orations and Letters*, Ginn

& Co., New York); Vergil, *Aeneid 4* (Macmillan Elementary Classics); Horace, *Odes 1* (Macmillan Elementary Classics).

2. Grammar—Bennett's *Latin Grammar* (Allyn & Bacon, Boston) or Allen and Greenough's *Latin Grammar* (Ginn & Co.).

3. Composition—Bennett's *Latin Composition* (Allyn & Bacon).

4. Sight Translation. (3 hours a week).

MATHEMATICS.

Algebra—Linear and quadratic equations of one, two and three unknowns; ratio and proportion; variation, graphs; inequalities; progressions; interest forms and annuities. (2 hours a week).

Text: DeLury's *Intermediate Algebra*.

Geometry—Inscribed, escribed, circumscribed center of triangle; mean center and orthocenter of triangle; radical axis and radical center of circles; axis of symmetry and axis of homology, center of symmetry and center of homology, harmonic properties of quads; collinear points and concurrent lines. A general review of substance of Bks. IV. and VI. of Euclid's Elements.

Text: Hall & Stevens, *A School Geometry*, Parts I.–VI. (Macmillan & Co.) (1 hour a week).

FRENCH.

Grammar; dictation; translation from English into French.

Translation at sight from easy modern French prose, and an examination on Dumas: *Les trois mousquetaires*. (3 hours a week).

GERMAN.

Grammar; dictation; translation from English into German.

Translation at sight from easy modern German prose, and an examination on *Geschichten von Deutschen Städten*, pp. 1–88. (3 hours a week).

GREEK.

1. Goodwin's *Greek Reader* (Ginn & Co.)

2. Goodwin's *Greek Grammar* (Ginn & Co.)

3. Composition—Bonner's *Greek Composition* (Scott, Forsman & Co., Chicago).

4. Sight Translation. (3 hours a week).

HEBREW.

Davidson, *Essentials of Hebrew Grammar*, pages 1 to 51, including the writing of exercises 164, 165, and 168 to 175.

Translation from English into Hebrew.

Translation into English of *Genesis* I. to IV., XL.; *Deuteronomy* IV., V., with grammatical analysis, parsing and vocabulary. (2 hours a week).

BIOLOGY.

Elementary Biology—An introductory course in Biology.

(a) Two lectures a week throughout the year.

(b) Four hours' laboratory work a week throughout the year.

CHEMISTRY.

Inorganic Chemistry—A course of lectures, demonstrations and practical work in general chemistry, including a detailed study of the more common elements, their source, method of preparation, properties, uses and compounds; also the laws of chemistry, chemical equations and chemical mathematics. The practical work consists of experiments covering the principles discussed and demonstrated in the lectures.

50 hours lectures, 50 hours laboratory. Laboratory fee, \$2.00—not returnable. Laboratory Deposit, \$5.00—returnable at end of session, minus deductions for breakage.

PHYSICS.

An introductory course presenting briefly the fundamental concepts of physics by means of lectures, demonstrations and experiments, and requiring only an elementary knowledge of mathematics. It will meet the needs of those who desire a general survey of the field, and will serve equally well as a foundation for more detailed study. Particular emphasis is laid upon the choice and definition of units. The following topics are treated, with their application to everyday experience:

- (1) *Mechanics and Heat*—Laws of motion, conditions of equilibrium, simple machines, mechanics of fluids, nature and effects of heat, calorimetry, the law of conservation of energy.
- (2) *Sound and Light*—Wave motion and types of vibration, velocity of sound, interference and resonance, laws of reflection, refraction and dispersion, photometry.
- (3) *Electricity and Magnetism*—Magnetic and hydrostatic fields, sources of electromotive force, laws of resistance, effects of electric currents, the fundamental principles of dynamo-electric machines.

Two lectures, two laboratory hours per week.

SECOND YEAR

ENGLISH LITERATURE.

Shakespeare, *Romeo and Juliet*, *Henry IV.*, parts I. and II.; *Twelfth Night*; *King Lear*; the selections from Bacon, Swift, Addison and Johnson in *Selected English Essays* (Oxford University Press). (2 hours a week).

ENGLISH COMPOSITION.

The writing of at least four original compositions. **Fortnightly** themes in class. (1 hour a week).

LATIN.

1. Vergil, *Æneid* 4 (Macmillan Elementary Classics); Horace, *Odes* 2, 3, 4 (Macmillan Elementary Classics); *Selections from Livy* (edited by Burton, American Book Co., New York).

2. Grammar—Allen & Greenough's *Latin Grammar* (Ginn & Co.)

3. Composition—Allen's *Second Latin Exercise Book* (Oxford Press).

4. Sight Translation. (3 hours a week).

ANCIENT HISTORY.

General History of Greece to 146 B.C. and of Rome to 476 A.D. The text-books will be Botsford's *History of Greece* (Macmillan Co.), and Pelham's *Outlines of Roman History*

(Putnam, New York). Considerable collateral reading will be required.

Candidates for Honors will be assigned a much wider range of reading than General Course students, and will be required to present reports during the year on special topics.
(2 hours a week.)

LOGIC.

Formal and inductive. Text: Jevons: *Elementary Lessons in Logic* (Macmillan).

PSYCHOLOGY.

Sensation, Thought, Emotion, Volition.

Angell's *Psychology* (Holt), or Stout's "*Groundwork of Psychology*" (Hinds, Noble). (1 hour a week.)

MATHEMATICS.

Algebra—Sums of squares and of cubes of natural numbers, applications; scales of notation; simultaneous, quadratic and cubic equations in two and three unknowns; imaginaries, undetermined co-efficients; elimination; permutations and combinations; binomial theorem, with applications.

(1 hour a week.)

Text: Hall & Knight, *Higher Algebra*, pp. 50-186.

Geometry—Analytical Geometry of the point, line and circle. (1 hour a week.)

Text: W. M. Baker, *Algebraic Geometry*, Part I.

Trigonometry—Trigonometrical ratios and their relations; values of ratios of common angles; formulas of circular measure; applications; ratios of the sum and difference of two angles, with derived formulas; logarithms; solution of triangles, with derivation of necessary formulas; radii of inscribed, escribed and circumscribed circles to a triangle; perimeters and areas of inscribed and circumscribed regular polygons, with consequences. (1 hour a week.)

Mechanics—(a) Statics and Dynamics, (b) Hydrostatics, (c) Heat.

Texts: Merchant, *Elementary Mechanics*; Glazebrook, *Mechanics and Hydrostatics*; Glazebrook, *Heat*.

FRENCH.

Grammar; dictation; conversation; translation from English into French.

Translation at sight from modern French prose, and an examination on Souvestre: *La main malheureuse* and *La question d'argent* (Heath & Co.). (4 hours a week).

GERMAN.

Grammar; dictation; conversation; translation from English into German.

Translation at sight from modern German, and an examination on: *Geschichten von Deutschen Städten*, pp. 1-88; Hatfield's *German Lyrics and Ballads*, II., III. (4 hours a week).

GREEK.

1. Plato, *Apology*; Thucydides, *Book 4*; Selections from Herodotus.

2. Grammar—Goodwin's *Greek Grammar*.

3. Composition—Sidgwick's *Greek Prose Composition* (Longman's, New York).

4. Sight Translation. (3 hours a week).

HEBREW.

Davidson's *Hebrew Grammar*, pages 51 to 79, including exercises and the remainder of the verbs.

Introduction to Hebrew literature and history.

Exodus, I. to IV.; I. *Samuel*, XVII.; I. *Kings*, XVII., XVIII., XIX., XXII.; II. *Kings*, XVII. (2 hours a week).

BIOLOGY.

Phanerogamic Botany—A course dealing with the morphology and classification of the flowering plants.

(a) Two lectures a week during the fall term.

(b) Four hours' laboratory work a week during the fall term.

Invertebrate Zoology—A similar course dealing with the invertebrate animals.

(a) Two lectures a week during the spring term.

(b) Four hours' laboratory work a week during the spring term.

CHEMISTRY.

Inorganic Chemistry—Qualitative and quantitative analysis—available only to students who have completed satisfactory work in first year Chemistry or its equivalent.

A laboratory course covering qualitative and quantitative analysis. Lectures bearing upon laboratory technique and new methods of analysis given as required.

The work will be to a large extent individual in character, each student being required to work out a definite number of unknown compounds during the session.

100 hours—Laboratory fee, \$2.00—not returnable.
Laboratory deposit, \$5.00—returnable at end of session, minus deductions for breakage.

PHYSICS.

Many of the topics treated in the first year will be taken up again with considerable elaboration and a more careful mathematical formulation of the laws involved, but without the use of calculus. In addition, certain principles will be discussed, which, on account of their more advanced nature, were omitted from the introductory course. The lectures will be supplemented by numerous illustrative problems and practical laboratory work in continuation of that of the previous year.

- (1) *Properties of Matter and Mechanics*—Dynamics of rotation, molecular mechanics, centre and movements of inertia, elasticity.
- (2) *Light and Heat*—The equations of simple harmonic and wave motion; Huygen's principle, elementary physical optics, the phenomena of color; mechanical theory of heat, properties of saturated vapors, equations of state.
- (3) *Electricity and Magnetism*—The absolute measurement of electrical and magnetic quantities, with a more detailed study of electromagnetic induction, hysteresis, self and mutual inductance and alternating current phenomena, with their modern practical applications.

Two lectures, two laboratory hours per week.

PUBLIC HEALTH AND BACTERIOLOGY.

A course of 50 lectures and 20 hours laboratory work.

The Honor Courses

GENERAL REGULATIONS

23. There are five Honor Departments, viz.: I., Classics; II., Modern Languages; III., English and History; IV., Mathematics and Physics; V., Political Science.

24. Honor Courses shall extend over five years registered attendance from date of Junior (Pass) Matriculation, or four years from date of Senior (Honor) Matriculation.

25. A student in the General Course who has completed the first year of that course with not more than one star, and who has obtained at least fifty per cent. of the aggregate marks in the examination for that year, may enter upon the First Year of an Honor Course in any department in which he has not fallen below 65 per cent. on the examination for that year.

26. Candidates shall not have the right to claim examination in more than two Honor Courses after the first year.

27. In the annual class lists the names of candidates who obtain honors in any department or subject shall be arranged in order of merit in three classes; those obtaining seventy-five per cent. and over of the total number of marks being placed in the first class; those obtaining sixty-six per cent. and less than seventy-five per cent., being placed in the second class; and those obtaining fifty per cent. and less than sixty-six per cent., being placed in the third class.

28. The regular examinations will be held for the Honor Courses in May.

29. A candidate pursuing a course in an Honor department who falls below the third class in his department shall not be allowed standing for the year. But candidates whose average is not less than third class, but who have fallen below third class in any one subject, may, on the recommendation of the examiners, be allowed to proceed as Honor candidates in the following year.

30. A candidate who fails to obtain standing in his Honor Course may receive credit in the General Course on such conditions as the Senate may determine.

31. A candidate who competes for Honors at the examination for Bachelor of Arts, and fails to obtain the requisite number of marks to entitle him to be classed in Honors, may, on the recommendation of the examiners, be awarded a degree without Honors; it being at the option of the candidate to accept the award of such a degree, or to wait until a subsequent examination, and again compete for a degree in Honors.

32. An undergraduate who has obtained Honors in any department may, with the consent of the Senate, be transferred to any other department, and proceed therein; but as a prerequisite to obtaining the Degree of Bachelor of Arts, he must, during his course, have passed the examinations in the subjects of the General Course required in the Honor Department to which he is transferred.

Conditions of equilibrium and equations of motion of a particle in a plane, with applications; treatment of the laws of force, hydrodynamics and hydrostatics without the use of calculus; elementary applications of calculus to the above; nature and effects of heat, elementary principles of thermodynamics and radiation, measurements of high temperatures.

Texts and references will be indicated to meet the needs of the class.

Two lectures, two laboratory hours per week.

SECOND YEAR

ALGEBRA.

The subject as treated in Hall and Knight's *Higher Algebra*, pp. 340-489, with suitable modifications and extensions. (1 hour a week.)

References: C. Smith, *Treatise on Algebra*; Chrystal, *Algebra*; L. G. Weld, *Theory of Determinants*; Burnside and Panton, *Theory of Equations*, Vol. I.

GEOMETRY.

(a) Analytical Plane Geometry: advanced course. (2 hours a week.)

Texts: C. Smith, *Conic Sections*; Salmon, *Conic Sections*.

(b) Synthetic Solid Geometry. (1 hour a week, one term.)

Text: Dupuis, *Synthetic Solid Geometry*.

- (c) Analytical Solid Geometry. (1 hour a week.)

Text: C. Smith, *Solid Geometry*.

TRIGONOMETRY.

Spherical Trigonometry, with applications to Astronomy. (1 hour a week.)

Texts: Dupuis and Matheson, *Spherical Trigonometry*; Barlow and Bryan, *Elementary Mathematical Astronomy*.

CALCULUS.

Differential and Integral: advanced course.

Texts: Williamson, Edwards. (2 hours a week.)

MECHANICS.

- (a) Newton's *Principia*.

Text: Frost's *Principia*.

- (b) Mechanics.

- (c) Electricity and Magnetism.

This course will treat Statical and Dynamical relations by the aid of the Calculus.

Texts: Henry Crew, *The Principles of Mechanics*; R. W. Stewart, *Higher Text-book of Magnetism and Electricity*.

GEOMETRICAL AND PHYSICAL OPTICS.

Laws of reflection and refraction with their application to optical measuring instruments; theory of refraction and dispersion; achromatism, spectroscopy, interference and refraction phenomena, polarization and double refraction.

Two lectures, two laboratory hours per week.

Department of Political Science

ADDITIONAL REQUIREMENTS:

First year—The course is the same as for the General Course, but students must obtain an average of 55 per cent. on Mathematics in order to gain admission to the honor classes of the second year. Students are advised to take the classes in both modern languages.

The Degree of Master of Arts

33. A candidate must be of at least one year's standing as Bachelor of Arts in this or any other University whose degree of Bachelor of Arts is accepted by the Senate of this University.

34. A candidate who obtained Honors at graduation may, on subsequently obtaining Honors at the examination of the Fourth Year in a course other than that in which he obtained Honors at graduation—the selection of such course to be approved by the Senate—be granted the degree of Master of Arts.

35. A candidate who at graduation obtains First-class Honors in two Honor Courses may, when the selection of courses has been approved by the Senate, without further examination, be granted the degree of Master of Arts.

36. A candidate who has obtained a degree in the General Course, not falling in his Fourth Year below Grade B in more than two subjects, or a candidate who has received his degree in an Honor Course, may receive the degree of Master of Arts on presenting a thesis adjudged to be of sufficient merit, containing the results of some special study or investigation of any subject approved by the professors and heads of the department or departments in the University in which the subject of the thesis lies. The candidate shall be required to undergo a written or oral examination on the subject of the thesis conducted by the professors and heads of the departments concerned, such written or oral examinations to be held during the annual examinations.

37. Notice of the subject which the candidate proposes to take for his thesis must be given to the Registrar on or before the first day of January, and the thesis must be presented on or before the first day of April.

38. It is recommended that the copy of the thesis presented by the candidate for the degree of Master of Arts be either printed or typewritten. When the degree is conferred, the thesis becomes the property of the University.

N.B.—It is anticipated that the requirements for the M.A. degree will be wholly changed for following years.

Admission “Ad Eundem Gradum.”

39. A graduate in the Faculty of Arts in any University (if his degree be not an honorary one) may be admitted, if approved, to the same degree in the Western University.

Appendix

THE FACULTY OF MEDICINE

The thirty-fourth session of the Medical Department of the Western University will begin on October 1, 1915. Supplemental examinations will be given on September 30 and lectures will begin on October 4. Registration should be completed on October 1; after October 4 a penalty is imposed for each day's delay.

Work in Physiology, Pharmacology and Anatomy will be conducted by full-time men in the Medical School Building where much new equipment has been provided for work in these departments. Work in Public Health, Pathology, Bacteriology, Chemistry and Physics will be carried on at the Institute of Public Health by full-time men.

Excellent opportunity is afforded at Victoria Hospital for the study of diseases common to this climate and for work in Surgery. Bedside teaching is also available at St. Joseph's Hospital, the Insane Asylum and the Byron Sanatorium.

A certificate of having passed the Junior Matriculation Examination conducted by the Education Department of Ontario (or its equivalent) is required for entrance into the Medical Department. Senior Matriculation including work in Biology, Chemistry and Physics is strongly urged.

The calendar and other information concerning the Medical Department may be obtained by addressing, The Medical School, York and Waterloo Streets, London, Ont.

THE INSTITUTE OF PUBLIC HEALTH

The Institute of Public Health has been established by the Ontario Government and is maintained by a provincial appropriation under the control of the Board of Governors of Western University. In the Institute laboratories are

performed the public health analyses for the western part of the Province. These consist of certain examinations in connection with diphtheria, tuberculosis, typhoid fever, and rabies, and with water sewage, milk, etc., which the Provincial Board of Health has arranged to have done free of charge. Other work is performed for physicians at a nominal fee. Analyses for industrial and commercial purposes are also undertaken. Besides doing public health and laboratory work, the staff of the Institute avail themselves of opportunities for the instruction of the public in all matters relating to the prevention of disease and the promotion of health, by lecturing before various clubs and societies.

The Institute is organized into divisions, the heads of which act as the heads of corresponding departments in the University. Through this connection, the students in Arts receive their instruction in Public Health, Bacteriology and Chemistry in the Institute laboratories. The course in Public Health and Bacteriology aims to furnish knowledge of very practical value to the individual and to render more comprehensible to the student the modern efforts to improve the public health.
